

5 reasons to choose the HAAKE MARS rheometer for Quality Control

Quality Control with ease

Rely on Thermo Scientific™ HAAKE™ MARS™ rheometer and get your QC job done right the first time – with confidence.

01

Reliable rheometer performance

- Rheometer system protection by innovative air bearing technology including an air pressure level feedback loop
- Continuous rheological measurement empowered by robust design, modularity and free software upgrade

02

Easy to use for daily routines

- Enhanced usability with “Connect Assist Technology” for rotor recognition with feedback loops and pneumatic rotor release
- Fast workflow with optimized sample handling enabled by the design of rheometer and accessories

03

Consistent results

- Automatic user guidance and customized SOP creation by Thermo Scientific™ HAAKE™ RheoWin™ Software
- Correct sample filling and temperature determination ensured by supporting accessories

04

Global support

- Reliable service and application support by global certified specialists
- Application and rheology training with on-demand Web trainings or in-depth hands-on training seminars

05

Bonus reason

- Save up to 25% on the Thermo Scientific™ HAAKE™ MARS™ rheometer*
