The Asynt & Fluorochem

Chemistry Starter Kits

Featuring the DrySyn heating block system for safe laboratory heating

AFP11014

- DrySyn Multi starter kit (base plate, 1 x 25ml insert, 1 x 50ml insert, 1 x 100ml insert)
- 500g Silicagel 60 Å 40-63 micron
- TLC plates silicagel 60Å 40-63micron (20 plates 20cm x 20cm)
- 2Kg Magnesium sulphate, anhydrous
- 100mL Chloroform-d
- 25mL Dimethylsulphoxide DMSO D6>99.8%
- Wilmad Precision NMR sample tubes (400Mhz, 5 tubes)

AFP21014

- DrySyn Parallel synthesis kit (base plate with 3 vials inserts, size 20.20mm) (vials are only for illustration purposes and are not included)
- 500g Silicagel 60 Å 40-63 micron
- TLC plates silicagel 60Å 40-63micron (20 plates 20cm x 20cm)
- 2Kg Magnesium sulphate, anhydrous
- 100mL Chloroform-d
- 25mL Dimethylsulphoxide DMSO D6>99.8%
- Wilmad Precision NMR sample tubes (400Mhz, 5 tubes)
